

# Not all air cleaners are created equal.

Spring cleaning is a tradition that allows us to freshen up our homes after a long winter, but many people forget about the importance of cleaning their indoor air. Beyond removing up to 99.98 percent of allergens from the filtered air, a Trane CleanEffects™ whole-house air filtration system may save you time cleaning this spring and all year long, because it greatly reduces dust accumulation.

Clean Air Delivery Rate: <b>10</b>	Clean Air Delivery Rate: <b>12</b>	Clean Air Delivery Rate: <b>150</b>	Clean Air Delivery Rate: <b>240</b>	Clean Air Delivery Rate: <b>660</b>	Clean Air Delivery Rate: <b>1,200</b>

Choosing the right indoor air cleaner is as simple as looking at the clean air delivery rate, which is a recognized standard for measuring the effectiveness of air cleaning appliances. The higher the clean air delivery rate, the more effective the unit is at cleaning the room or home of airborne particles and allergens. The chart above highlights the effectiveness of Trane CleanEffects when compared with other air cleaners. You can learn more about clean air delivery rates by visiting [www.trane.com](http://www.trane.com).
